

Reality Check in the Real World... Getting the Most from *RealWorld* Now and Tomorrow

Technology is ever evolving. But it is not always feasible to invest in the latest hardware and software to run your business. Since Great Plains purchased *Real World*, Any Business Systems, Inc. has migrated many *RealWorld* users to *Great Plains Standard* or *Great Plains Professional Accounting Software*. However, we still support nearly **100 *RealWorld*** installations and strive to keep these systems performing well.

The longevity and performance of your accounting software depend on a robust, internally compatible and well-maintained infrastructure. This includes:

- version compatibility between operating systems and applications.
- updated desktop and server configurations
- effective backup software and procedures
- up-to-date applications and procedures to ensure internal and Internet security

Reality Check in the Real World is designed for *RealWorld* users to assure that your business is getting the best performance from your technology.

Server and client upgrades and software patches extend the life of your investment. Any Business Systems' **Reality Check in the Real World** inventories your current hardware and software status, identifies essential upgrades and procedures that will extend the life of your system as well as lay the foundation for

- improved functionality
- improved security
- improved performance
- improved reliability
- improved longevity
- a preserved upgrade path

A **Reality Check** for your *RealWorld* accounting application will give you a complete analysis of your *RealWorld* system, including file maintenance procedures, a straight forward assessment of your server and workstation status as well as upgrade options to enhance the viability and performance of your investment.

This analysis is the basis for a **Reality Check PLAN** that includes recommendations and actions tailored to your business.

A modest investment now will avert major problems, preserve your upgrade path and protect against unexpected costs.

What our *Real World* clients say about the quality of service provided by Any Business Systems, Inc.

ABS has consultants whose knowledge and understanding of our accounting application is outstanding. Their pleasant and positive attitude towards fixing our situation is refreshing. They listen to the needs of our business and know how to utilize the application to meet those needs. They are willing to roll up their sleeves and dig into any situation,

To summarize, ABS consultants provide accessible, dependable and customized service to the company with a great attitude. Anytime the accounting department has a question about the application, the consultants have the answer or are willing to find out the answer.

ABS has made the difference to the company's successful conversion and plays a critical role in the continued progression of fully utilizing the accounting application for the needs of this unique company.

Gina Gagnon, Accounting Manager/Controller
The Westwood Group, Inc.

I have complete confidence in your skills and integrity. Thanks for all your fine service and especially for the timeliness with which you address all our problems.

Robert Osmun, Owner
Osmun Music Inc.

We have always received great service from ABS.

Sandal Keefe, CFO
Local Government Center

I wanted to take a minute to tell you about my experience with your technical support team at ABS. While working in our accounting application, I had some questions that needed answers. I called the office and was connected to technical support immediately. The person that worked with me was both courteous and helpful to my problems and concerns. Ms. Piri helped me the most by being professional and knowledgeable in her area of expertise. She was able to walk me through the screens step by step and allowed me to get reports printing by the end of our conversation. She is truly an asset to your organization and this achievement should be recognized.

Karen Murray, Accounting Manager
National Coalition of Advocates for Students
