

## Are You Doing Enough to Ensure the Safety and Integrity of YOUR Critical Data?

Along with all the benefits of being connected to the Internet come challenges. The integrity of the data you use to make critical business decisions can be threatened by viruses, worms, hackers or even disgruntled employees.

Your data must be protected from these threats. **But it takes more than virus protection and spam blocking software to create a truly secure computing environment.**

**Any Business Systems, Inc.** offers a proactive program for small to medium size business without the on-site staff to understand and implement essential security strategies.

### You need a secure foundation on which to build a secure computing environment

Any Business Systems' **Systems Analysis and Foundation Evaluation (S.A.F.E.)** evaluates your need for protection against viruses, spam and hackers — threats which may be from inside or outside of your business.

More importantly, we identify any vulnerabilities in your entire computing infrastructure and create a plan with remedies. Virus protection software, spam-blockers and a firewall are necessary components of a secure system, but your entire computing infrastructure must be secured as well. **The S.A.F.E. Technology Plan provides the essential over-all security strategies your business needs to prevent losses that could be devastating!**

Any Business System's **S.A.F.E.** program offers this proactive method for assessing the security of your entire computer system including:

- Hardware Review
- Operating System Review
- Application Review
- Internet/Network Security
- Data Recovery Plan

The results of the S.A.F.E. service is a **Technology Plan** — a road-map for taking necessary action to preserve the integrity of your technology and your critical data.

3 Ballard Way, Suite 304—Lawrence, MA 01843 978-794-2333

## What clients say about working with Any Business Systems, Inc.

*ABS consultants provide accessible, dependable and customized service to the company with a great attitude. Anytime the accounting department has a question about the application, the consultants have the answer or are willing to find out the answer. ABS has made the difference to the company's successful conversion and plays a critical role in the continued progression of fully utilizing the accounting application for the needs of this unique company.*

Gina Gagnon, Accounting Manager/Controller  
The Westwood Group, Inc.

*I have been extremely pleased with your firm and the attention to detail all of your consultants bring in anything they do.*

Paul DiSanto, Controller  
Spang Controls

*I am particularly pleased that if a solution or answer is not immediately apparent, ABS will work to find the necessary information. The knowledge and professionalism displayed is impressive.*

Linda Houle-Briggs, Business Manager  
Northeast/Safetyloid, Co.
